

Soft Material Separator

Function:

The Mavitec Separator is a water separator for by-products and feathers. The length of the stainless steel drum is 3.390 mm. The unit is completed with a stainless steel frame, a rotating drum sieve driven by an electric motor with fixed speed and transport auger for the offal and feathers in de sieve.

Features:

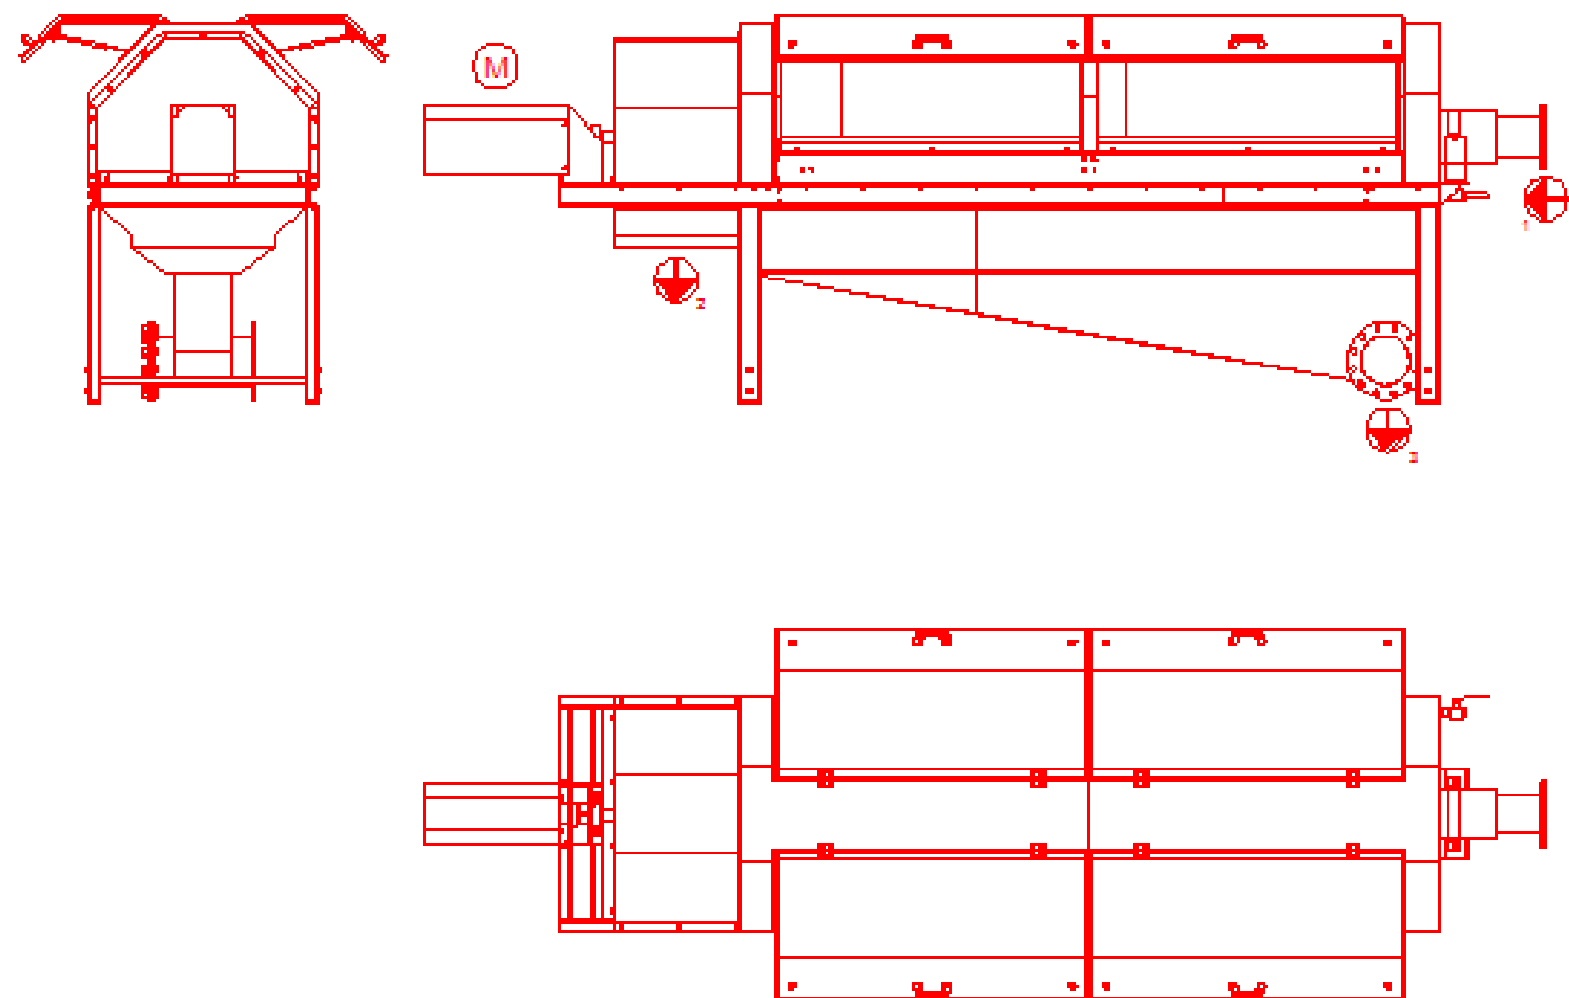

- The Soft Material Separator separates water by using gravity
- The system saves energy because the free water does not have to be evaporated
- Due to its smart design the Separator is cost-effective

Capacity / Range: suitable upto 12,000 bird/hour
