

Pressor High Pressure Screw Press

Designed for higher throughput and lower fat residuals from a variety of rendered materials.

Long service life and low maintence costs.

- Choose from a wide range of sizes and configurations to meet every rendering application—from the largest, with a 13" shaft for increased throughput and improved feed capability on soft, difficult-to-press materials, to a compact and efficient 7" model ideal for smaller plants.
- Pressors are available with horsepower ratings between 60 to 300 HP and a choice of shaft configurations.
- All Pressor models offer proven reliability, rugged construction and feature a single motor to drive all mechanical parts.
- Available with the new Dupps Hybrid HCPR (<u>High</u>
 <u>C</u>ompression <u>Press Release</u>) shaft for up to 25%
 lower residuals in most rendered products.
