

Blood Separator

The Mavitec Blood Separator efficiently removes larger-sized foreign materials from the raw blood stream. This unit features a robust stainless steel frame and is equipped with a rotating drum sieve, which is powered by a fixed-speed electric motor. Additionally, it includes a transport auger specifically designed for the efficient handling and removal of the separated material.

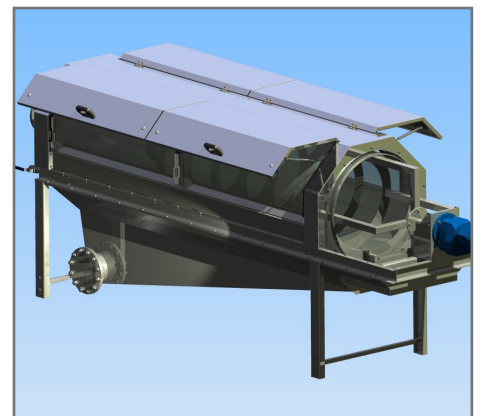

Features:

- The Blood Separator utilizes the principle of gravity
- The system prevents congestion in the blood proces line
- Due to its smart design the Separator is cost-effective

Capacity:

- Up to 70 m³/hr*

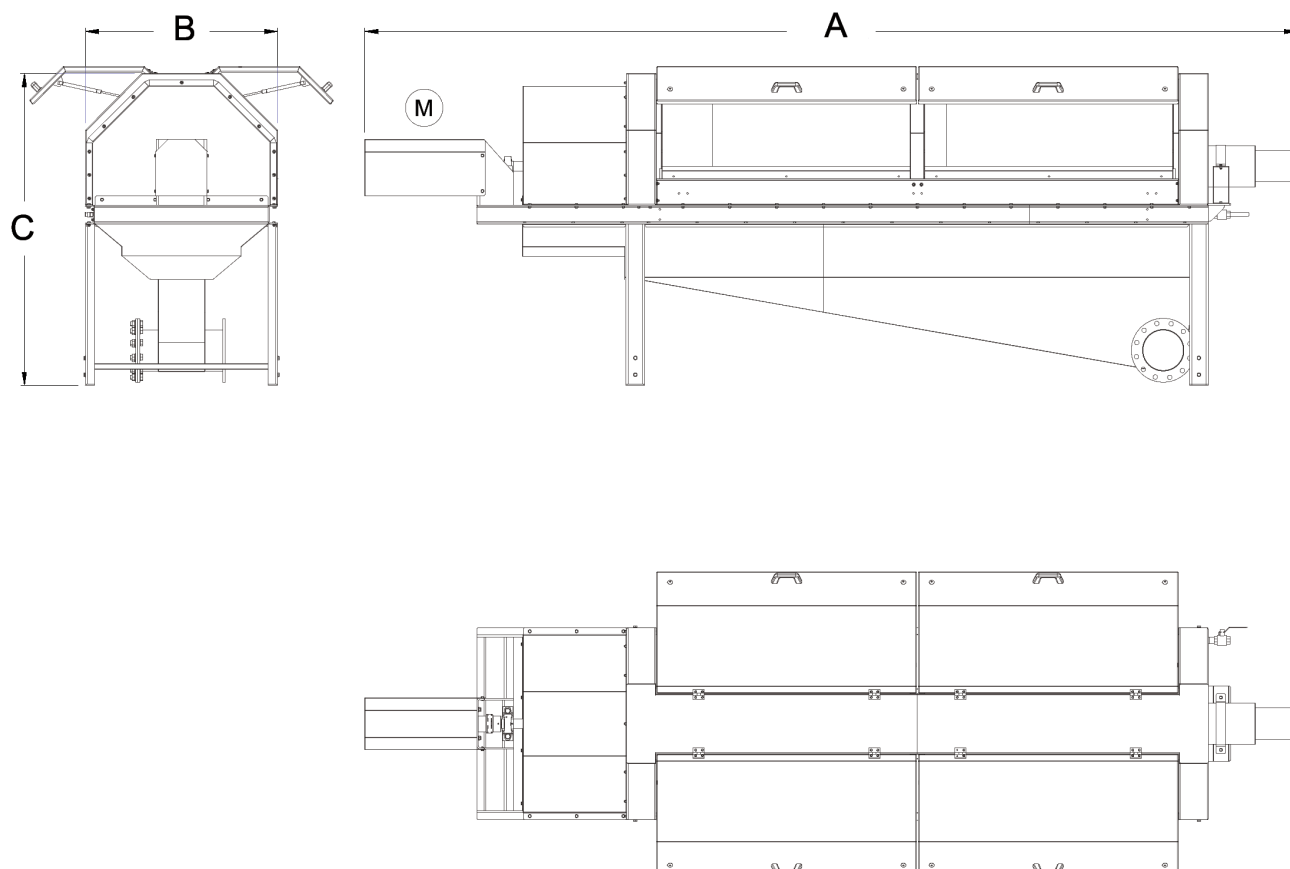

*depending on the type and level of impurities present in the blood.
